

2 visiting scholars named for '86-'87

The Office of the President and the Department of Graduate Studies and Research announce the appointment of Jerome D. Schein as the 1986-87 holder of the Powrie Vaux Doctor Chair of Deaf Studies and Desmond J. Power as the 1987 Distinguished Visiting Scholar.

Dr. Schein is professor of communication arts and sciences and director of the Deafness Research and Training Center in the School of Education, Health, Nursing and the Arts Professions at New York University, positions he has held since 1970.

Dr. Schein's primary project as the holder of the Powrie V. Doctor Chair of Deaf Studies is entitled "An Analysis of the Growth and Development of the Deaf Community in the United States." This study will combine historical reviews, structured interviews and survey data collection methods to present a comprehensive understanding of the deaf community.

The study will address such issues as the events associated with the genesis of the deaf community; the factors which shaped its development historically and which continue to exert influence today; and the roles played by major contemporary and historical figures in this development.

In addition, Dr. Schein will be active on campus in teaching and advising. He will arrive on campus in September.

Dr. Power is the director of the Centre for Human Development Studies and principal lecturer in psychology and special education at the Mt. Gravatt campus of the Brisbane College of Advanced Education in Queensland, Australia, positions he has held since 1979.

Dr. Power's primary project during his semester here will be work on a series of books and related materials for use in developing communication skills in deaf children, an ongoing major project of his. In addition, he will be discussing the design for U.S.-Australian cross-cultural research studies, which would continue after his return to Australia.

Dr. Powers will also be available for discussion, lectures and seminars with faculty, professional staff and students. He will arrive on campus in January 1987 for a six-month stay.

The Powrie V. Doctor Chair of Deaf Studies was established in 1972 in recognition of the contributions of Dr. Doctor, a member of the Gallaudet faculty for 43 years. Ten scholars have held the chair; the most recent are Eugene Petersen, Dr. Boyce R. Williams, Dr. Alan B. Crammatte and Dr. Robert G. Sanderson.

Six deaf leaders honored at GCAA dinner

"The collective responses of this year's winners of the Gallaudet College Alumni Association awards were among the most electrifying that I can recall at a Charter Day banquet," said Jack Gannon, executive secretary of the GCAA and executive director of Alumni Relations and Advancement.

Gannon's remark followed the traditional Charter Day banquet April 12, during which the Laurent Clerc Cultural Fund committee presented the awards to outstanding deaf leaders. Among the recipients were five Gallaudet alumni.

Professor **Yerker Andersson** of the Department of Sociology and Social Works received the 1986 Edward Miner Gallaudet Award "for valuable service to deaf people of the world." Dr. Andersson is currently president of the World Federation of the Deaf. He was also recognized for his past services as foreign news editor of the *The Deaf American*, a former publication of the National Association of the Deaf (NAD); chairman of the NAD International Relations Committee; and vice president of the World Federation of the Deaf.

William J. Marra received the 1986 Laurent Clerc Award in honor of "his contribution to the heritage of deaf people." Marra, formerly a houseparent and teacher at the Oklahoma and Kansas Schools for the Deaf until his retirement in 1976, was a pioneer in deaf adult education in the Kansas City area.

Rex Lowman, right, congratulates John Yeh at the GCAA awards dinner. Yeh, founder and president of his own company, received an award for "notable achievement" by a young alumnus.

In 1950, as Marra witnessed the destruction of valuable documents at KSD, he began collecting memorabilia and devoted the next 36 years to preserving this valuable part of deaf heritage. In 1981 this collection at KSD was named the Marra Museum. Marra was unable to attend the ceremonies; his son, William, accepted the award.

Actress **Phyllis Frelich** received the 1986 Amos Kendall Award in recognition of "her enduring ability to bring enlightenment and pleasure to all people." Frelich, one of the

founders of the National Theatre of the Deaf, attained national prominence with her starring role as Sara in the stage production "Children of a Lesser God." She was most recently seen in the Hallmark Hall of Fame presentation, "Love is Never Silent."

Lester C. Stanfill received the 1986 Alice Cogswell Award for volunteer services with the Indiana Chapter of the Registry of Interpreters for the Deaf. In addition to evaluating and advising many appli-

Diplomat with nerves of steel: Meet Gallaudet's operator

Ever feel like applying a sledgehammer to your telephone? Try sitting in Carolyn Lattimore's chair for awhile.

She is the sole telephone operator for the campus, handling roughly 300 calls a day on 12 lines, 100 extensions. Lattimore answers TDD and voice calls with equal calm and diplomacy, even when six calls are coming in at once. Hers is the smooth, velvety voice that says to outside callers, "Good morning [or afternoon], Gallaudet College. May I help you?"

Lattimore works in a small office tucked away at the end of a hallway on the third floor of College Hall. From 8:30 a.m. to 5 p.m. she responds to the low-toned beeping noise of calls coming through her desktop switchboard, quickly looking up office extensions and channeling calls, soothing impatient callers, making sense of occasional strange inquiries. She takes off

Carolyn Lattimore, Gallaudet's telephone operator, handles a call.

Hearing loss, aging focus of meeting attended by heads of senior centers

The Special Populations Program (SPP) of the National Academy, in conjunction with the Gallaudet Research Institute (GRI), conducted a day-long symposium entitled "Hearing Loss and Aging: Responding to the Needs of a Special Population" on April 8.

The symposium, coordinated by Maureen Durkin of SPP and Israel Sela, senior research scientist with the GRI, was designed to provide senior center administrators with state of the art information and training on hearing loss and aging, technical accessibility, and practical program planning in senior centers throughout the country.

Following welcoming remarks by Provost Catherine Ingold, presentations were delivered by various members of the campus community and by off-campus administrators, directors and coordinators of senior centers that provide services to deaf and hard of hearing older persons.

Highlighting the symposium was the keynote address by Dr. Sela, who reported on his recent national survey of senior centers and clubs serving hearing impaired persons. Said Durkin, "This was particularly interesting to participants, each of whom represented senior centers that were included in the survey."

Other members of the Gallaudet community who gave presentations were Dr. Patrick Cox, professor and chair of the Department of Audiology, who spoke on "Facts about Hearing

Israel Sela gives keynote address.

Loss and Aging;" and Dr. Harriet Kaplan, assistant professor in the Department of Audiology, who spoke on "Focus on Access."

Cynthia Fernandes, coordinator of the Assistive Devices Center; Alfred Sonnenstrahl of the National Academy; and Dr. Richard Phillips, dean emeritus of the Department of Counseling, also gave presentations.

According to Durkin, the symposium increased the College's store of information about service needs of older hearing impaired persons while sharing Gallaudet's extensive expertise on hearing loss with outside service providers.

DEC-10s victims of computer aging; VAX-8600s prepped for takeover

After 16 years of faithful service, the pioneers of computerization at Gallaudet will be retired in May.

The DEC-1090 computers, fondly known to their friends on campus as "DEC-10," are about to give way to the young, upwardly mobile breed of VAXes.

Since 1971, DEC-10 computers have been on the go day and night

helping out in numerous campus units. Among services rendered were assistance with Russian and English instruction and student registration, records handling for accounting, personnel and bookstore sales, calculation of solutions to mathematical equations and the compilation of bibliography lists.

During lighter moments, the DEC-10s were also known to play a shrewd game of blackjack.

But, according to one VAX 8600 computer, acting as spokesmachine for campus computer network, "We are ready to take over."

Dr. David Torr of Computer Services, in an attempt to phase it more diplomatically, said, "The VAXes provide multiple functions to serve large numbers of users reliably and are less expensive to operate and maintain. Computer Services has been moving projects to the VAX computers for the past two years."

Computer Services has contacted most of the DEC-10 users to assist them in transferring data to a VAX. Users are advised to get a VAX account number from Bob Herbold at Computer Services, plus step-by-step instructions for using 10BACKUP to transfer large files and taped instruction for using DECnet link for transferring small files. Manuals for using the VAX are available on racks in the HMB 118 computer user room.

Facing the inevitable, the DEC-10s declined the usual retirement reception. However, as a reminder of their honorable years of service, plans are underway to program them with time displays in gold lettering.

Announcements

In recognition of Professional Secretaries Day, Dr. Lee and the Central Administration will host a champagne reception for the secretarial and office support staff on April 23 from 2 to 4 p.m. on the portico of Chapel Hall. In the event of inclement weather, the reception will be held in Chapel Hall.

The Youth Leadership Camp, sponsored by the National Association of the Deaf, will hold its 18th season of summer events for high school students ages 14-19 from July 6 to Aug. 3. The camp, located at Swan Lake Lodge, Pengilly, Minn., features a comprehensive development program for and with deaf youth. Anyone wishing to register or obtain information should contact Roger Claussen, x5823 (V/TDD).

Disco Nite will be held at "Ole Jim" April 25 from 7 p.m. to midnight. Admission is free, the cash bar will offer Happy Hour prices all evening and free "munchies" will be served. Music will be provided by DJ Wylie "Spider" Myers.

The week of June 22 to 28 has been declared "Helen Keller Deaf-Blind Awareness Week" by resolutions in Congress with the approval of President Reagan. The Helen Keller National Center in New York is urging all citizens to encourage the planning of state and local activities during the designated week to promote awareness and to emphasize the need for continuing services, training, housing and employment opportunities for all Americans who are visually and hearing impaired. For more information, call the center, (516) 944-8900 (V/TDD).

Manna, Inc., a nonprofit housing redeveloper in Washington, D.C., has affordable co-op housing available near Kendall Green. Two-, three- and four-bedroom units are for sale for persons with income in the \$20,000s. For more information, call Manna, 462-8686.

Kings Dominion in Virginia is offering "Deaf Awareness Day '86" on Saturday, May 31 with special shows, exhibits, interpreters and discount tickets. Students from MSSD will present a special performance, and agencies working for deaf and hearing impaired people will have exhibits. Tickets are available to groups of 10 or more for \$8.50 per person (in advance). Individuals may purchase tickets at Kings Dominion on May 31 for \$9.50. For more information, call Kings Dominion, (804) 876-5000, or write Kings Dominion, Deaf Awareness Day, Doswell, VA 23047.

Champion banjo player and folk singer Cathy Fink and folk duo Maggie will present a sign-interpreted benefit concert on Saturday, May 3 at 8 p.m. at Montgomery Blair High School, Silver Spring. Diane Rehm, WAMU's mid-morning host, will be the guest emcee for the show, presented by the Montgomery County Chapter of the National Organization for Women. Tickets are \$7 in advance, \$9 at the door, \$5 for students and senior

citizens, and \$20 for sponsors. For more ticket information, call 236-0069 for a recorded message.

The Montgomery County Department of Public Libraries will show the captioned film "Proud Rebel" on Thursday, April 24 at 7:30 p.m. in the Davis Library, 6400 Democracy Blvd., Bethesda. The department has a variety of services at other locations for deaf and hard of hearing patrons, including a special needs library, an interpreted storytime and technological aids. For more information, call 493-2554 (TDD) or 493-2555 (V).

The Gallaudet Museum will have an open house for faculty, staff and students from 1 to 5 p.m. on Wednesday, April 30. On exhibit will be the Archives collection of rare books, published before 1900, on deafness and deaf people. The museum is located in Chapel Hall, next to the Office of Campus Ministries.

Barbara Tuck, a representative of Lawrence Livermore Labs (LLL), will give a presentation at 9 a.m. on Tuesday, April 29 for students interested in learning about co-op and/or full-time work at LLL in the following areas: technical information, computer science, physics, engineering and chemistry. Any graduating student who wants an interview should sign up at the Career Center. Students interested in a co-op position should sign up in EPOC. Faculty members are invited to talk with Tuck in EPOC, Ely Center room 102, at 1 p.m. She will discuss the LLL Summer Institute and applicants for the summer of 1987.

New publications board considers manuscripts

The Kendall Green Publications editorial board met last month to consider new manuscripts and proposals.

The newly selected board consists of Rubye Frye, chair, program supervisor at Kendall School; Loraine DiPietro, director of the National Information Center on Deafness; Leonard Goldberg, marketing manager of Pre-College Outreach; Judy Hoyer, primary project director for Prince George's Co., Md.; Robert Loftus, instructor at MSSD; Nancy Pollack, coordinator of Adult Basic Education; and Ben Schowe Jr., instructor at MSSD.

Kendall Green Publications, part of Gallaudet College Press, was established in 1984 to publish books for children and youth.

Three new titles are available from Kendall Green Publications this spring: "Belonging," a novel for teenagers by Virginia M. Scott; "Now I Understand," a children's story about deaf awareness by Gregory S. LaMore; and "Ear Gear: A Student Workbook on Hearing and Hearing Aids" by Carole Bugosh Simko.

Two new sign language books for beginners will be published later this year. "I Can Sign My ABCs" by Susan Chaplin is a full-color alphabet picture book with 26 signs. "My First Book of Sign" by Pamela J. Baker teaches signs for 150 words used most frequently by young children.

Gallaudet College is an equal opportunity employer/education institution. Programs and services offered by Gallaudet College receive substantial financial support from the U.S. Department of Education.

Grant winner sees College as natural math training place

"Gallaudet is the natural place to train mathematics teachers of hearing impaired students," said Professor Harvey Goodstein of the Department of Mathematics and Computer Science.

According to Dr. Goodstein, strong support from mathematics teachers on and off campus prompted his proposal entitled "Summer Institute in Mathematics and Computer Science for Pre-College Teachers of the Hearing Impaired," for which he received a \$553,000 grant from the National Science Foundation.

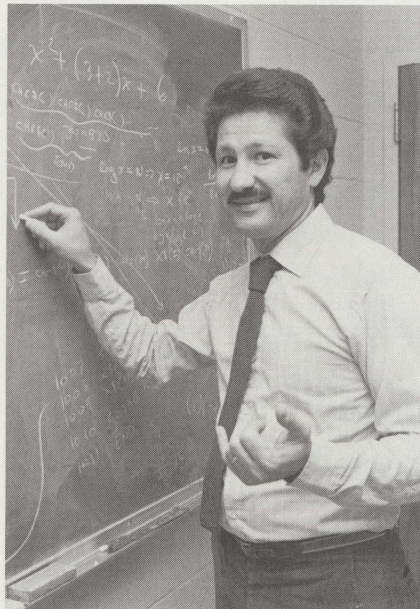

Dr. Goodstein said that members of the mathematics faculty have noticed for some time that entering students were not being properly prepared for math courses.

Also, recent studies by Dr. Goodstein indicated that most elementary and secondary teachers of mathematics in programs serving deaf students have inadequate backgrounds in mathematics. "Many of the study participants expressed a need for in-service training in mathematics education, preferably at Gallaudet," he said.

Three objectives of the institute are improvement of the teachers' backgrounds in mathematics, introduction to teaching methods that are most effective with deaf students and familiarity with microcomputer software for teaching math. "Naturally," said Dr. Goodstein, "our ultimate goal is improvement of students' abilities in mathematics."

Elementary and secondary teachers will be selected by a screening committee comprised of faculty members from the mathematics departments at the College and at MSSD.

Instructors in the summer programs will include collegiate faculty members

Dr. Harvey Goodstein

John Kubis and Raymond Kolander, teaching mathematics; and MSSD faculty Charles Dietz and Joseph Innes, teaching computer literacy.

Dr. Goodstein said that the encouragement he received from Dr. Robert Johnson, professor and chair of the Department of Mathematics, and from other members of the College community helped him through the development of his project, which he began last summer.

He also expressed gratitude for the assistance he received from Stanley Matelski, director of Gallaudet's Office of Sponsored Programs (OSP), and other staff members at OSP.

Recruitment brochures are being sent to administrators and mathematics teachers in schools and mainstream programs nationally that serve deaf students. "Because we hope to recruit trainees from a large geographical area, the program needs to be broadly publicized," said Dr. Goodstein.

"Our work is just beginning," Dr. Goodstein added. "We must now work to ensure the success of the summer institutes, which can then serve as a model for similar programs in the Gallaudet Regional Centers. In addition, funding must be sought for the continuance of such programs."

Musical scheduled

MSSD Performing Arts will present "Quest," a new musical, on May 8-10 and May 14-17 at 8 p.m. and on May 9 and 14 at 10 a.m. in the MSSD Auditorium. Student actors and dancers will perform a combination of sign language, mime and dance with the accompaniment of live voices and orchestra.

A romantic fantasy story about the strength of the human spirit, "Quest" is based upon a scenario written by MSSD Performing Arts director/producer Tim McCarty.

Tickets are now available by mail order or telephone reservation. Beginning April 28, tickets will also be on sale weekdays from noon to 1 p.m. in the MSSD lobby. Tickets are \$6 for nonstudents, \$4 for general students and senior citizens and free to MSSD students with IDs. For more information, call x5801 (V/TDD).

Correction

In the April 14 issue of *On the Green*, Pat McCoy's graduation year from Prince George's Community College was incorrectly stated as 1977. She graduated in 1983. In addition, she belongs to a deaf awareness group called "I Hear Your Hand," not "Deaf Awareness Sign/Sing," as stated.

Telephone operator: 300 calls a day

continued from page 1

only between 11 and 11:45 a.m. to grab a lunch.

"Many people think there are 10 operators here," said Lattimore. "They'll say 'I'm not sure if you're the same operator I talked to before,' but it's always me." For the first four months working here, starting in October, Lattimore didn't leave her desk all day.

"I'm dedicated to this desk," Lattimore said. "I love dealing with the public, I love talking with people. I'm the first person here that some people talk to. I can't see being discourteous. I get very irritable when I see someone who works with people who doesn't have the right personality to do that kind of work. You can kill some people with kindness," she added with a grin.

Lattimore does get some angry phone calls. "They can get mad all they want to. When you deal with the public you have to expect some people in a hurry who don't understand. I don't get that many unpleasant calls." And besides, she's been answering phones for a long time. She worked as an operator for AT&T for 10 years in Washington, some of that time at the overseas switchboard.

Most calls coming in during the day at Gallaudet are from parents of students, according to Lattimore. "They have questions about a bill, or their child is in the infirmary, something like that." Calls for information are directed to the National Information Center on Deafness. The majority of callers know the name of a person to whom they want to talk.

Had she ever felt like rearranging the face of her phone? Lattimore just smiled. Did she ever get riled? Another smile. Any complaints of her own? She had to stop and think.

Well, yes, two "requests" for campus phone users. Sometimes entire offices close up early, or everyone leaves at lunchtime, and Lattimore unknowingly continues to direct calls there. The calls come back to her after three rings, and she is not sure what to tell callers. She

would appreciate an office member calling her to say the office will be empty, especially during lunchtime, her busiest time of day for answering calls.

And secondly, when she is transferring an outside TDD call to an office, she stays on the line to inform the person answering that it is a TDD call. Sometimes the person will tell her, "Oh, So-and-so is not here," instead of taking the call and giving that message to the caller. "I have been instructed [by supervisors] not to take messages," said Lattimore. "I am supposed to simply transfer the call."

Does the ring of her phone at home send her running for cover, after she's answered the phone all day? No, said Lattimore with a smile, "My 13-year-old daughter answers the phone all the time. I never get the chance."

Remember: x5000 is College's main number

Before Carolyn Lattimore was hired by Business Services as Gallaudet's operator in October, the College did not have a full-time person answering a central number. Calls came in to several numbers, including Alumni Relations and Advancement, Personnel Office and Department of Safety and Security.

Off-campus callers still frequently call those old numbers, perhaps because they are using old directories. On-campus people can help busy offices here to keep misdirected phone calls to a minimum by spreading the word to outside callers that the main number for the campus is 651-5000.

Callers for Public Relations should call x5928 or x5108; the Visitors Center is x5703 or x5590; and the National Information Center on Deafness is x5109 or x5976.

Those calling about matters for *On the Green* or *Gallaudet Today* should dial x5100.

Six award presentations highlight annual GCAA dinner

continued from page 1

cants, Stanfill served as president of that organization for five years. For many years he taught sign language to public servants such as police and fire fighters. In honor of his teaching career in woodworking at the Indiana School for the Deaf, the school's vocational building was named for him in 1976.

John Yeh, founder and president of Intrograted Microcomputer Systems, Inc., received the 1986 GCAA/Alexandria-Potomac Lion's Club Outstanding Young Alumnus Award for "notable achievement in his personal and professional life."

Willard Shorter received the 1986 Laurent Clerc Award for "outstanding social contributions" to the deaf community. Retired in 1976 after 35 years with the Hecht Co., Shorter is presently coordinator of Deafpride's senior citizen project.

A native of Washington, D.C., Shorter was recognized for serving in a variety of positions, including senior deacon for the Shiloh Baptist Church Silent Mission; community liaison for the National Center of Law and the Deaf; a

member of the Mayor's Committee on Handicapped Individuals; a board member for D.C. Services for Independent Living; and a board member of Deafpride, Inc.

The guest speaker, GCAA president Gerald "Bummy" Burstein, spoke on humorous aspects of his recent trip to France.

Among members of the College administration who attended the awards banquet were President Jerry C. Lee;

Dr. Catherine Ingold, provost; Lou Markwith, vice president for College Relations; Jim Barnes, vice president for Administration and Business; and Doin Hicks, vice president for Institutional Research, Planning and Evaluation.

Five former GCAA presidents participating in the event included David Peikoff, Boyce Williams, Malcolm Norwood, Leo Jacobs and Ronald Nomeland.

GCAA plans to issue statement

The board of directors of the Gallaudet College Alumni Association (GCAA) met the day before the traditional Charter Day celebration on April 12.

Among business transacted by the GCAA board was a discussion of alumni concerns involving the provost selection process. The board plans to issue a statement on the subject.

The board members also agreed to prepare and print a simplified version

of parliamentary procedures to be distributed among deaf youth and to cover the cost of a braille edition of the *Gallaudet Alumni Newsletter*.

Other topics included GCAA's involvement in the upcoming University Week celebration and plans to hold its fall meeting during those festivities.

The board tentatively agreed on the first week of July 1989 as the date of the GCAA centennial reunion.

Sponsored R&D

Proposals for basic research in the behavioral sciences and social sciences are being solicited by the U.S. Army Research Institute (ARI). While single investigator efforts will be considered, preference will be given to collaborative efforts. Such efforts may involve researchers at a single institution or in several institutions, joint university-industry partnerships, or prime and sub-contractor arrangements.

The ARI has several areas of interest to be addressed which include planning, problem solving, decision making, unit performance, skill building technologies and designing systems for people. The ARI is looking for projects that take a multidisciplinary approach to the areas of interest, such as cognitive psychology, educational or measurement psychology, systems analysis, computer or cognitive science and anthropology.

Concept papers should be submitted by June 30, and formal proposals by Sept. 30, to be considered for summer 1987 funding. Concept papers of 3 to 5 pages should describe the problem, the approach, and potential outcomes in relation to ARI's mission.

For additional information on these opportunities, contact the Office of Sponsored Programs at x5033 or x5034, or write Basic Research Office, U.S. ARI, 5001 Eisenhower Ave., ATTN: PERI-BR, Room 6N 50, Alexandria, VA 22333-5600.

Provided below are application deadlines of selected programs that offer potential grant or contract opportunities for faculty, staff and graduate students. More details on these and other programs of interest can be obtained from the Office of Sponsored Programs, x5033 (V/TDD).

Deadline	Program
Varies	NSF: Research Opportunities for Women
5/1/86; 8/1/86	HHS: Special Maternal and Child Health Services
6/1/86; 10/1/86	World Rehabilitation Fund; Fellowships-Study Abroad
6/1/86; 10/1/86	HHS/NIH: FIRST (First Independent Research Support Transition) Award
6/1/86	NSF: U.S. Italy Cooperative Science Program
6/1/86	NIH: Research Project Grants
6/1/86	HHS-NIA: Research on Aging Program Projects
6/2/86	NRTA-AARP Andrus Foundation: Research Grants
6/15/86	Indo-U.S. Subcommittee on Education and Culture: Research in India
6/24/86	ED: Library Literacy Program
7/1/86	NSF: Behavioral and Neural Sciences Program
6/30/86	U.S. Army Research Institute for the Behavioral and Social Sciences (concept paper)
7/1/86	ED/NIHR: Innovation Grants
7/1/86	HHS-NIA: Research on Aging Research
7/15/86	NSF: Sensory Physiology and Perception Program; Behavioral and Neural Sciences Program
7/15/86	NEH: Travel to Collections
7/15/86	Deafness Research Foundation (1st Year)
7/15/86	NIH: Child Health and Human Development
7/31/86	ED/OERI: Unsolicited Proposal Program

David Updegraff, right, holds a picture of the campus presented to him by Ed Corbett. Dr. Updegraff was honored at a reception in "Ole Jim" for his 17 years of service to Gallaudet before leaving to become superintendent of the Michigan School for the Deaf.

Among Ourselves

Rachel M. Hartig in the Department of Foreign Languages recently received a PhD in modern languages and literatures from Catholic University. Her dissertation, which applies new critical perspectives to the analysis of 19th century French literature, is entitled "Androgyny in the Novels of Guy de Maupassant." Hartig's work was funded in part by a grant from the American Association of University Women.

Dr. B. Patrick Cox and Scott J. Bally, both of the Department of Audiology, were featured speakers at a Howard University symposium entitled "Cochlear Implants: An Overview" last month.

Gallaudet has appointed two new assistant football coaches to its 1986 staff. Greg Klees was defensive line coach for 10 years at Catholic University, and Joe Pascale was head coach at Catholic for 11 years. Pascale, who is Gallaudet's offensive coordinator, produced more than 10 years of winning teams at Catholic.

Barbara Brauer, assistant professor in the Center for Studies in Education and Human Development, moderated a series of presentations on the topic "Mental Health and Deafness Research: An Update from Pioneering Treatment Efforts" at the annual meeting of the American Orthopsychiatric Association in Chicago on April 9. Others serving on the panel were Ray Trybus, dean of Graduate Studies and Research, Allen Sussman, dean of Student Affairs, and Virginia Cowgell, director of the Counseling Center.

Louis Schwarz, a 1968 Gallaudet graduate and an account executive with Integrated Resources Corp., has become a certified financial planner. Schwarz offers Integrated's Harvest and ICAP tax-sheltered plans as part of Gallaudet's 403(b) program. For more information, call Schwarz at 587-5996 (TDD), or write him at 814 Thayer Ave., Suite 301, Silver Spring, MD 20910.

Pat McCoy of the Office of Admissions and Records has been listed in two biographical reference publications for professionals, "Who's Who of American Women" and "Who's Who in the East."

John Fayed has just been named the new manager of design and construction for the Physical Plant Department. Involved in construction management and related industries, Fayed's former position was general manager/chief operating officer for State Electrical Contractors, Inc. He received a bachelor's degree in business administration from the University of Maryland and holds a master electrician's license. Fayed will coordinate and execute all of the Physical Plant's major construction and renovation projects.

Robert Davila, vice president for Pre-College Programs, has been selected "Honored Alumnus for 1986" by the School of Education, Syracuse University, New York, where he received his PhD. Dr. Davila was also recognized in *Education Exchange*, a Syracuse University publication, for his leadership in education of deaf students.

Delays cited in project

Ernie Spriggs, director of the Physical Plant Department, offers apologies to the campus community for the inconvenience caused by the chilled water/steam line extension project on the lower end of campus.

According to Spriggs, unavoidable delays have been encountered due to wet weather in February and hydrostatic test requirements that must be performed on the lines according to construction codes. A hydro test must also be completed on the insulation before the trench can be covered.

The Physical Plant Department will continue to notify the campus community about developments in the project.

You and Your Job

Don't forget that a representative from the HEW Credit Union is in the Ely Center every Wednesday from 10 a.m. to 12:15 p.m. The office is next to the Student Union Office and the multipurpose room.

The HEW representative can provide all services except cash transactions.

Applications for membership, loans or VISA cards are available in the Personnel Office in College Hall, room 7.

Jobs Available

Some of the advertised staff positions may already be filled. For updated information, call the JOB RECORDING in the Personnel Office, x5514 or x5520 TDD.
